

### **Go/No Go**

This opportunity will be offered to the first 25 people who register. If all seats fill up, we will maintain a wait list for any interested individual in the case of cancellations. Due to planning purposes, refunds will be offered until 30 days prior to the event. A refund will forfeit your seat and it will be offered to the next available individual.

### **Rain or Shine**

This event will happen rain or shine. The majority of this workshop will be indoors and the topics we will cover outside only need a dark sky to help. As always with what we do, clouds and bad weather can happen.

### **Star Party Etiquette**

This workshop will maintain a star party atmosphere in the evening. General star party behavior will apply such as no loud music, red lights only after dark and vehicles in or out on an as needed basis. Lasers are only permitted by staff for instructional purposes. General 3RF rules apply. Any individual on campus during the workshop will be required to sign liability release and "Hold Harmless" forms. The campus is a safe, fun and friendly environment.

### **Meal Plan**

As an optional add-on to the offered package, a meal plan will be available. The meal package will be for lunch and dinner on the two main days of the workshop only. There will be no meal offered on Sunday. Also, if you do decide to opt *out* of the meal plan, understand that the nearest town is 20 minutes away from the campus. Even then, choices are slim but there is a pizza place and another restaurant. Vernon, TX will be another half hour or so away with more options as well as a Wal-Mart. Please plan accordingly.

### **Bunkhouse Accommodation**

Included with your package will be bunkhouse lodging and classroom snacks. The bunkhouses are very nice and climate controlled with males and females bunking separately. No bedding or pillows will be provided. You should plan to bring a sleeping bag/blankets and your pillows for the bunk. Five cabins are available on a first come first serve reservation.

### **CPE Time**

If you are working toward CPE time, this opportunity will offer 10 hours total for the classroom portion and 6 hours total for the evening portion. Evening sessions are weather permitting. There is potential of a 16 hour accumulation.
